

For this project, you have to create a replica as mentioned below using Bootstrap only.

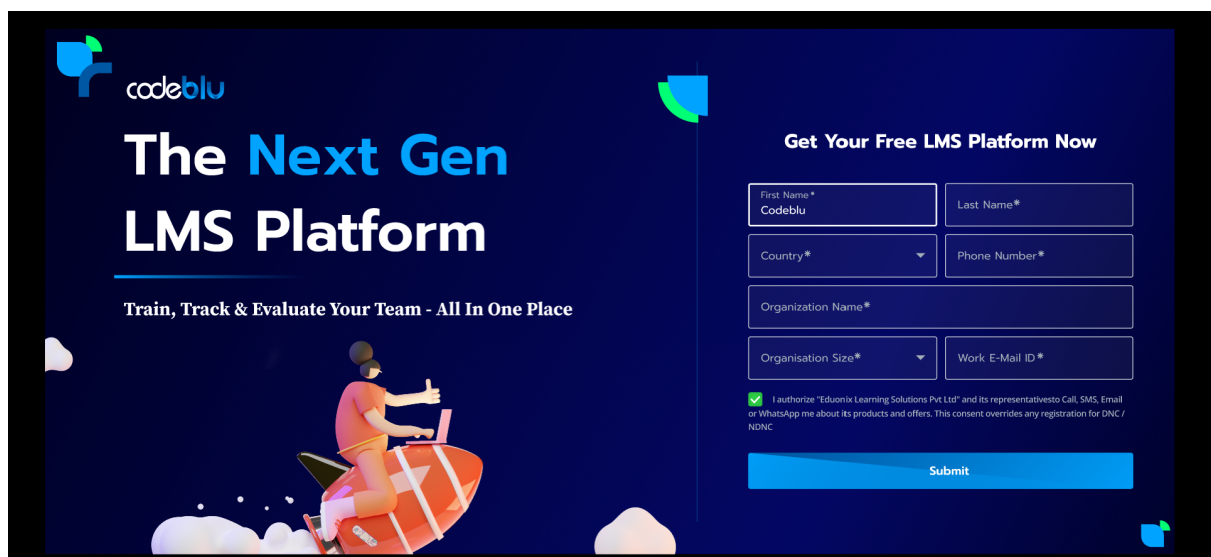

- The pages as displayed should be for both mobile view and display view.
- In mobile view, upon clicking “Get your free LMS platform now” the candidate should be thrown to the next page which consists of the form as shown in the below link.
- The submit button of the form does not have to be functional, upon click it should give a popup saying “Form Submitted Successfully”

The image shows two mobile view mockups. On the left is a landing page for 'codeblu' titled 'The Next Gen LMS Platform' with the tagline 'Train, Track & Evaluate'. It features an illustration of a person on a rocket. On the right is a modal form titled 'Please fill the form.' with the subtitle 'We will reach you'. The form contains fields for First Name, Last Name, Country (dropdown), Phone Number, Work E-Mail ID, Organization Name (dropdown), and Organisation Size. At the bottom, there is a checkbox for authorization and a close button (X).

Phone View

- The functionality has to be the same for the desktop view as well, the submit button should throw a popup of just refreshing the form to its original state.

The image shows a desktop view mockup of the 'codeblu' landing page. The title 'The Next Gen LMS Platform' is prominent, with the tagline 'Train, Track & Evaluate Your Team - All In One Place'. On the right, a sidebar contains the heading 'Get Your Free LMS Platform Now' and a form with fields for First Name, Last Name, Country, Phone Number, Organization Name, Organisation Size, and Work E-Mail ID. A 'Submit' button is at the bottom of the form. A checkbox for authorization is also present.

Desktop View

Please refer to the below link and make the project in Bootstrap strictly. You will have to create your account on the below figma to be able to completely access the link, and post that you can download the elements needed for the page.
